Source of Fibre  
Allergen Free  
Heat Stable  
Long Shelf Life

## Source of:

Antioxidants  
Fibre  
Potassium  
Iron  
Vitamin C

## Claim:

Source of antioxidants for the maintenance of good health

## Product Description:

Sourced from the wine growing regions of Ontario, Canada and Chile, Bioflavia™ is an organic red wine grape skin powder. Dried at low temperature to preserve its health benefits, Bioflavia is available as two products: Bioflavia™ SO (Skins Only) and Bioflavia™ NHP (Natural Health Product). Both Bioflavia products provide powerful antioxidant health benefits with an Oxygen Radical Absorption Capacity (ORAC) Value of 4,100 ORAC Units per 10g.

The daily consumption of antioxidants is critical for maintaining a healthy lifestyle. Antioxidants neutralize Free Radical molecules present in the body that are associated with various diseases including cardiovascular disease, some cancers and ageing. Versatile and heat stable, Bioflavia™ SO and NHP, can be easily incorporated into a variety of products as an added source of antioxidants for the maintenance of good health, as a colourant, flavouring agent and adding texture.

## Applications:

Dry and Liquid Beverages  
Smoothies  
Dietary Beverages  
Nutraceutical  
Baked Goods  
Cosmetics

Chocolate and Confections  
Dairy and Yogurt  
Spice Blends and Seasonings
